

A triple - action, hybrid wetting agent, WaterGold® is the highest - performing, water-saving agricultural agent in the world.

University - tested and approved, WaterGold® is an environmentally safe surfactant, humectant, and root penetrant that reduces watering requirements while increasing crop yield.

WaterGold® is a patented product containing synergistic compounds that improve water penetration and holding capacity. It is a self-agitating liquid fed directly into any irrigation system using a chemigator or fertigator.

- University-tested and approved
- Environmentally safe
- Increases crop yields
- Increases available soil moisture by as much as 35%
- Non-toxic, biodegradable, non-corrosive
- Water retaining agent
- Increases efficiency of water
- Increases soil moisture between irrigation cycles
- Allows water to enter soil more freely
- No harsh chemicals
- Reduces stress on crops
- No polymers
- Reduces wear and tear on pivots and equipment
- Improves uniform coverage of fertilizer
- Reduces amount of fertilizer required
- Reduces evaporation

✓ **Water Consumption**
Reduced by up to 35%

✓ **Crop Yield**
Increased by up to 30%

Basic Application Rate: One gallon/acre/season. 32 oz. per irrigated acre for the first application, then at a rate of 32 oz./acre every four weeks. Specific protocols provided for various crops.

**Improving
millions of acres
of crops annually.
Saving millions of
gallons of H₂O annually.**

- ✓ **Save Water**
- ✓ **Save Time**
- ✓ **Save Fertilizer**
- ✓ **Save Money**
- ✓ **Save the Earth**
